Out pops a tad-pole, with gills and a tail. It swims a-round with the fish and the snails.

## Chorus

C D-/C G C

There's a cy-cle of life for all liv-ing things. Frogs be-gin as tad-poles and then start grow-ing up, up, up

in-to a-dults. The cy-cle's nev-er end-ing.

## Verse 2

When the tadpole begins to sprout tiny legs, it's ready to hop into life's next stage. It becomes a froglet after growing lungs, and then it's able to breathe in oxygen!

## Chorus

## Verse 3

The frog starts to hop around on lily pads and loses the tail that it once had. Then as an adult, the frog looks for a match. One day, more eggs will be ready to hatch
