

From Seed to Apple Tree

Verse

1. Sun, soil, and air are mag-i-cal, you know. Mix them with a seed, an ap-ple tree will grow.

The seed sends out roots to hold it-self in place. A sap-ling sprouts leaves and catch-es the sun's rays.

Chorus

There's a cy-cle of life for all liv-ing things. Ap-ple trees be-gin as seeds and then start grow-ing

12

up, up, up so ver-y tall. The cy-cle's nev-er end-ing.

17

Verse 2

Season after season,
the apple tree matures.
Its buds bloom into
pink-and-white flowers
If a buzzing bee visits,
bringing some pollen,
from each pretty flower
an apple will ripen.

Chorus

Verse 3

Apples are tasty fruit
that people like to eat.
Buy them at the store
or pick them off a tree.
And inside each apple,
there are seeds, you know.
With sun, soil, and rain,
a new apple tree will grow.

Chorus (2x)
